GreenScape Planters & Flower Pots

GreenScape is a specialising company in landscape engineering and decorations, which mainly supply a wide range of garden products including various types of contemporary and classic planters and flower pots. Our main types of planters are; stainless steel planters, fibreglass planters, LED planters, zinc planters.

We work with large pots and planters all the time. Our selection of plant pots and designer planters are suitable for everyone from the do-it-yourself designer to trade.

We have everything from garden pots and outdoor planters to those extra large planters you may find difficult to get hold of anywhere else.

By far the most popular interior planters are the self-watering planters ranges. You can buy your pots and large planters from us with confidence, and with advice and plants as well.

We are happy to accept your project requirements even if it is only for planters, except of our available ranges we have bespoke solution for your project needs. Except of var the range of planters you find in this catalogue, we have a special kind of engineerd vertical greening planters which we prefer to be installed either by our staff or under the supervision of our engineers as they are mostly technical products to provide you with an engineering solution for the greening ideas appear to be impossible with normal consideration. You will find more details regarding vertical greening range in one of our other catalogues.

We have different planter options for both indoor and outdoor applications, in various types of projects including residential and commercial projects as well as public areas and urban street planters. In this catalogue you find a wide range of our fibreglass planters.

Fibreglass Planters

Fibreglass planter range made from fibreglass and resin making them durable, lightweight and weather resistant. With their elegant design, they are an ideal fit for any garden area, complementing a wide range of plants.

Our best selling range of garden planters, where the choice of fibreglass allows a huge choice of planter styles, shapes, sizes, colours and finishes. Whether you have a classic, traditional, modern or contemporary garden there will be a fibreglass planter for you! The fibreglass material results in a practical, durable planter that will NOT crack in the frost, will NOT fade over time in the sunlight and is EASY to maintain and clean.

The in-garden range of fibreglass planters offer a huge choice of styles including Troughs, Cubes, Cylinders and Tall Tapered or Cubed Planters ~ perfect for whatever planting schemes you may dream of.

Characters of Fibreglass Planters

The first character of Fibreglass Garden Planters is that it offers plenty of insulation, which helps to keep the roots and soil inside the pot from freezing during the winter and thus, one can use these pots outside the whole year.

An excellent choice for any location, but especially when weight is an issue, for example on a roof garden or balcony.

The fibreglass flower contained planters have capacitive retention of moisture very well. One need not have to take up the pangs of watering the beautiful plants on a daily basis. But you certainly need to come up and confirm that the containers or pots are quite well maintained and properly drained.

Such Modern Planters are different comparing to the each other but then there are few common features that may be seen in most of the fibreglass pots. Here some of those amazing features have been enlisted below:

- All this genres of garden planters are mainly made with the help of fibreglass materials;
- Since it's made of fibreglass material, it can withstand all genres of dangerous elements like moistures or the high percentage of humidity or even it can withstand the heat factor as well.
