

## GreenScape Vertical Greening

# Infinity Series

Our vertical greening infinity series comprises of cambered planter, trapezoid planter and square planter, which can be used in combination to build different style landscaping. This series planters are also widely used in lamp post green, modular rooftop green, fence green, green wall, parks, squares, streets, front doors, etc. They are self-watering planters, convenient to use and grow plants and maintenance friendly

## Infinity Series Self watering Planters

## Various Combinations

## Product Features

### 1) Multiple combination patterns, easy assembly and rapid prototyping.

According to certain situation, site or theme, this planter can be built together into different styles landscaping flower bed with multiple shapes, multilayer structure, and multiple pictorial styles, such as sphere, polygon, cylindricity, etc.

### 2) Water conservation and labor saving

Each planter of landscaping infinity series has its own independent water tank, offering automatic water supplement from the top flower box to the bottom one and no need for daily irrigation, which cannot only solve the problem of irrigation, but lower the maintenance cost.

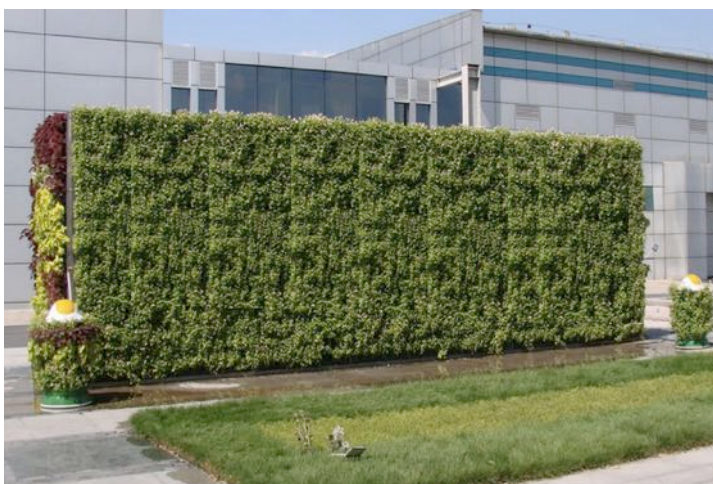

### 3) Mobile Garden

This series planters are easy to assemble and reusable, which ensure to create a spectacular vertical landscaping with multilayer structure and multi-angle.

### 4) Various Applications

It can be used as a free standup structures such as round and square tower, walls or any other stright or round shapes, also it can be used to surround lamp post, trees building round and square columns for decoration purpose. Furthemore, it can be used as a green wall cover for existing walls, another wide application is to use it as a fence with or without special base stands.

## Application Samples/ Free standing walls

## Application Samples/ Green wall cover

## Application Samples/ Street Fence

## Application Samples/ Lamp Post & Tree Greenery

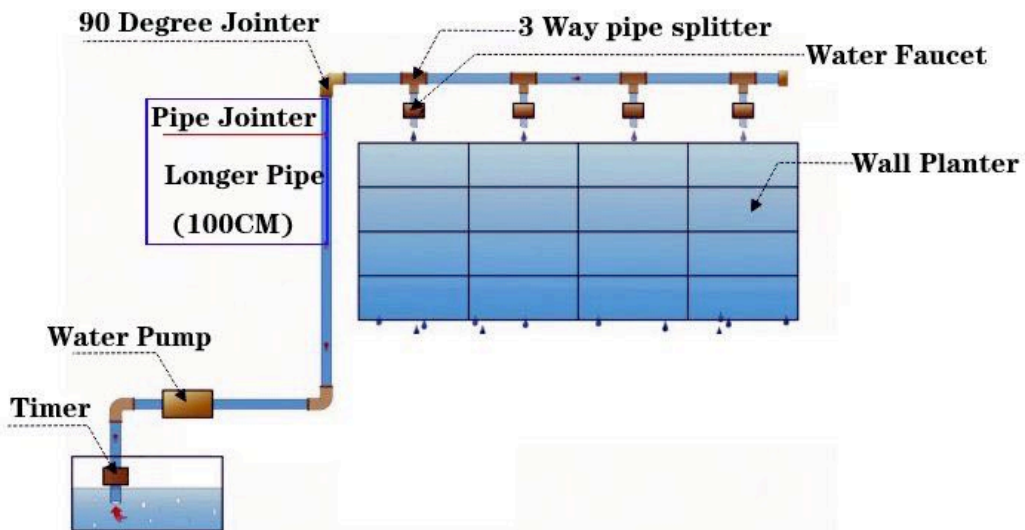

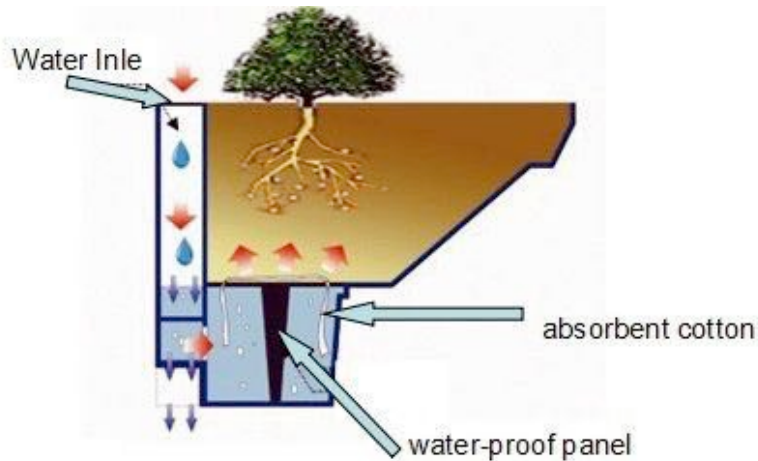

## Application Samples/ Columns & Towers

## Irrigation System

With self-watering irrigation system, through the main water pipe and flow control valve, water flow from the top to each planter's storage tank. The water drainage from the top planters is then collected and transferred to the next planter. At the bottom layer there is a water sink for excess water drain
