

GreeScape Vertical Greening

Live Panel Vertical Greening

Live Panel greening planter is a square panels with 500mm side length, these planters can combine together to build a whole green wall easily, each panel consists of 16 pots and each of them can grow one plant. the plant growing medium should be rapped with a geotextile layer then put inside the pot to keep its content during the water flows and provide enough protection to roots against hot and cold weather.

Item: SL-Y5012

Size: Lenght 500mm X Width 500mm X Depth 120mm

Color: Black

It can grow 16 plants, 4 pieces / square meter

Live Picture front view

Product Features

- 1) Simple and generous design, easy to install
- 2) At the bottom there is a water storage area, can save and drain water
- 3) Small holes on the panel to fix it with screws or cables tied to the steel support.
- 4) With different plants and flowers, it can be DIY'd into different designs and shapes as you like.
- 5) Professional buckle design can prevent the plants from dropping.

Installation

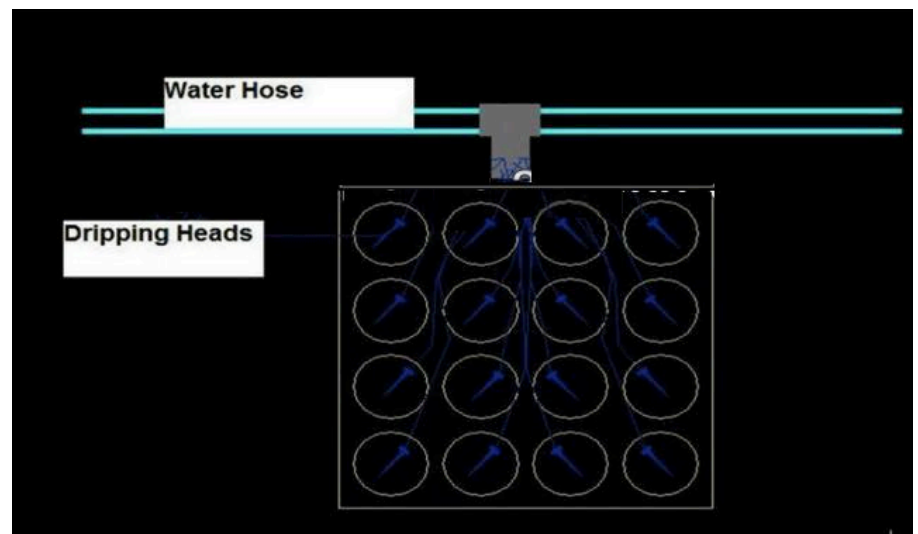

Around each groove there are several tiny holes, which are buckle holes, used for fixing the non-woven fabric, to ensure the soil inside it will not drop when implanting the plants

Around the four sides to the planter are 14 tiny holes, which are fixing holes, used for fastening the planter on the steel structure.

Irrigation System

For each layer you have to install irrigation pipe then for each pots inside the panel you need to put one drip as appears within the following pictures.
