

Two-side Green Wall

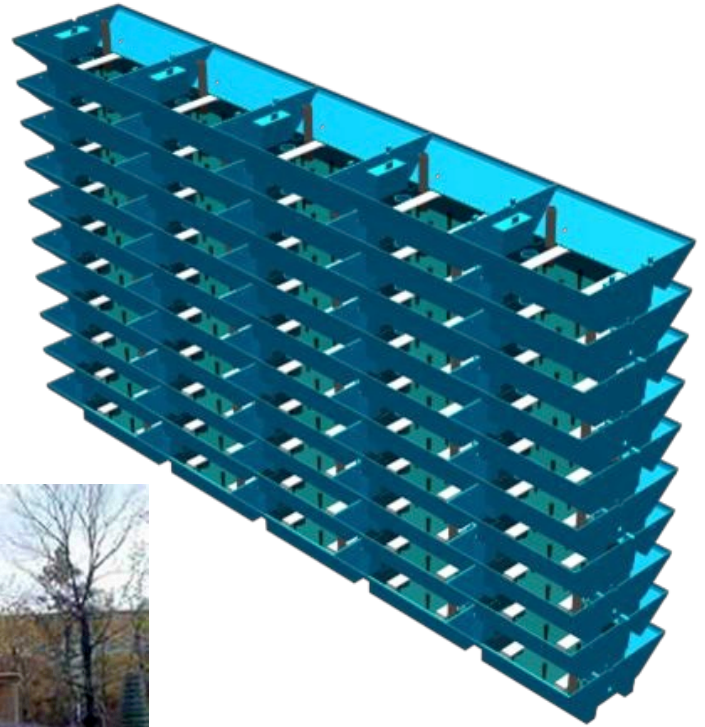

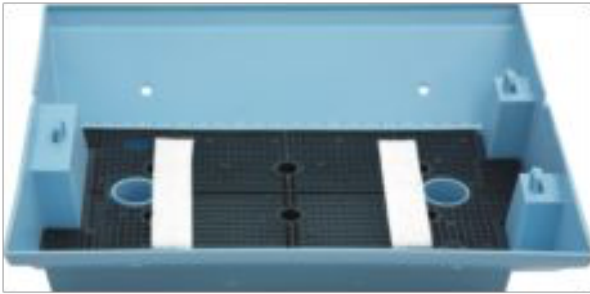

Item: GSL-YC5045

SPEC: L 500 mm W 450 mm Thickness 180 mm

Color: Blue, Grey

Each tray can grow 6-8 shrubs, 14 Planters / square meter

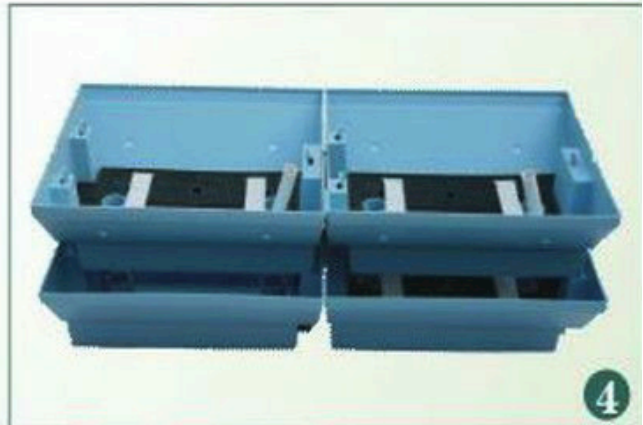

1 set consists of 1 planter tray + 1 water-proof panel + 2 pcs cotton tape

Features & Advantages

- The product GSL-YC5045 is a unique planter which can achieve the effect of two-sided vertical green wall. This planter leaves a great scope for the choice of plants because of its large size, which can accommodate enough soil and substrate. Besides, the GSL-YC5045 system has great advantages on installation and maintenance.
- The irrigation technique adopted in this system is developed by our company itself, which can ensure that the time used for irrigating a set of green wall is no more than 5 minutes. By applying this technique, the water use efficiency can be improved and the vegetation period can be longer, which are benefit for reducing comprehensive cost.

Installation

Irrigation

Two-side green wall modular planters are self-watering planters, convenient to use and grow plants and maintenance friendly, the water is stored at the bottom of the planters, and soil is above the black grid panel, when the soil is dry, 2 white fibres can absorb the water from the bottom to nourish the plants.
